SUMMARY

Flutter Developer with hands-on experience building cross-platform mobile and web applications using Flutter and Dart. Proficient in UI/UX implementation, responsive design, and state management using Provider and GetX. Experienced with backend and cloud integrations including Supabase (Auth, Database, Realtime, Storage) and Firebase (Auth, Firestore, Realtime Database, Storage). Passionate about mobile app development, clean architecture, and delivering user-friendly, scalable solutions.

SKILLS

Languages: Dart, HTML, CSS

Frameworks & Technologies: Flutter (Mobile & Web), Cross-Platform Development, REST API Integration, JSON Parsing, Payment Gateway Integration

State Management: Provider, GetX, Riverpod

UI/UX: Responsive Design, Custom Widgets, Material Design, Adaptive UI/UX Implementation

Backend & Database: Supabase (Authentication, Database, Realtime, Storage), Firebase (Authentication, Cloud Firestore, Realtime Database, Storage), Isar (Offline-First, CRUD), Hive (Key-Value Storage), Sqflite (Relational Database, SQL CRUD)

Tools & Version Control: Git, GitHub, VS Code, Android Studio, Antigravity, Cursor

OPEN SOURCE

[Firebase auth kit - Pub.dev](#) / *Flutter Package Author · MIT License*

- Published a production-ready Flutter package providing drop-in Firebase authentication UI with 350+ downloads.
- Supports Email/Password, Google Sign-In, and Phone OTP flows with auto tab-bar layout when multiple methods are enabled.
- Single **AuthUIConfig** covers background styles, header theming, full **AuthColorScheme**, per-field widget overrides and custom validators.
- Exposes **AuthController** for headless usage with auth state streaming; callback-based navigation — no named routes required.
- Managed full package lifecycle: API design, documentation, versioning, and pub.dev publishing.
- **Tech:** Flutter, Dart, Firebase Auth, Google Sign-In, Cloud Firestore, FlutterFire CLI

PROJECTS

[RailLive — Real-Time Indian Railway Tracker](#) *Flutter · Dart · Firebase (Auth, Firestore, FCM), Provider, REST API (Rapid API), Razorpay, Geolocator, Flutter Map*

- Built a cross-platform Flutter app for real-time Indian train tracking, live status, and passenger communication using the IRCTC RapidAPI.
- Implemented Provider (ChangeNotifier) for state management and integrated Firebase Authentication, Cloud Firestore, and FCM for authentication, real-time group chat, and push notifications.
- Developed offline train-number autocomplete using a local JSON dataset, search suggestions, and persistent recent searches with SharedPreferences.
- Built anonymous train-specific group chat with coach selection (Reserved/General), swipe-to-reply, and real-time Firestore streams.
- Integrated Razorpay payments, Geolocator, Flutter Map, and latlong2 for payments, location-based features, and interactive route mapping.

- Implemented robust API error handling (403, 404, 429), followed clean architecture, and secured API keys using flutter_dotenv.

[Instant Photos – Cloud Photo Sharing Platform](#) | Flutter Web, Dart, Firebase Auth, Firestore, Firebase Storage, Realtime Database

- Built a cloud-based photo sharing web application for event photographers to upload, manage, and securely distribute event photos at scale.
- Integrated Firebase Storage for high-resolution image upload and retrieval with role-based public/private access rules for secure media management.
- Implemented real-time photo availability using Firestore listeners, enabling attendees to view newly uploaded photos instantly without page refresh.
- Developed a face recognition-based filtering feature allowing attendees to automatically filter and view only their own photos from large event galleries.
- Designed a digital album system for photographers to create, organize, and share curated event collections via shareable links.
- Applied responsive design principles to ensure consistent UI/UX across desktop and mobile browsers.
- Designed a digital album system for photographers to create, organize, and share curated event collections via shareable links.
- Applied responsive design principles to ensure consistent UI/UX across desktop and mobile browsers

[SevaSutra – Community and Health Survey App](#) | Flutter, Dart, Isar, Firebase Auth, Cloud Firestore

- Developed a structured community and health survey mobile app for NGO fieldwork, supporting multi-step data collection for beneficiary demographics, medical vitals, and health screening.
- Implemented an offline-first architecture using Isar local database, enabling uninterrupted survey collection in low-connectivity rural environments with automatic cloud sync when online.
- Integrated Firebase Authentication and Cloud Firestore for secure user login and centralized cloud data backup accessible by coordinators.
- Built intuitive UI screens including survey creation flows, saved data listings, and detailed record views with structured navigation (drawer, settings, Help & Support).
- Optimized long-form UX for non-technical field users and resolved real-device debugging challenges including form validation edge cases and Isar schema migrations.

EDUCATION

Gharda Institute of Technology – Khed, Maharashtra

Bachelor of Engineering (B.E.) in Computer Engineering | CGPA: 8.23 / 10 | Aug 2022 – Jun 2026(Completed)
